An oyster patty is composed of several distinct clauses. The outer epidermis of the oyster patty is a sort of a little coffin, made out of dough—a great deal more "do" than raise, usually—all nicely tucked in at the edges and pretty enough to wear for a watch charm. In the center is a period of depression, which is intended for a home and fireside for the oyster. The oyster fits this place quietly and decorously, and you angle for him with a fork and feed him into your person with a noise and motion similar to kissing a red-headed girl on the freckles at a country dance.
